

Product Specification Report

2/96320001/0218

Double-use aerosol. Compressed air for the removal of dust from electrical and electronical components, and cooling gas to locate defective components on printed circuit boards or interruptions in electrical materials.

MICROSEC F

Dual use aerosol: compressed and cooling air

FEATURES:

Powerful airflow	Hold the spray can upright for quick and easy removal of dust. Also removes small particles of electrical/electronical materials, without damaging them.
Coolant	Use the can upside down to use as a coolant up to -30 °C, the gas can be used for locating faults or for the protection of heat sensitive elements during welding.
Easy to apply	A practical spray can, with an extension straw to reach even the most difficult places for cleaning or cooling.

APPLICATIONS:

For the cleaning of keyboards, PCs, typewriters, photo-electric cells, electronic components, cameras etc. Also for detecting defects on electronic boards, locating defective transistors, protecting heat sensitive components during soldering.

SPECIFICATIONS:

Form Aerosol
Odour Characteristic
Nett volume 500 ml

COMPATIBILITY:

Can be used on different materials, both electrical and electronical, when unplugged.

INSTRUCTIONS FOR USE:

Shake well before use. Hold the can upright for compressed air for various purposes. Hold the can upside down to spray the cooling gas. If necessary, the extension tube can be used.

PRECAUTIONS FOR USE:

For more information, refer to the MSDS.

All information in this document is based on our practical experience and/or laboratory tests. Due to the multiplicity of conditions for usage and variable human factors, we recommend that you always test our products for suitability prior to use. At any time, this version of the product specification report may have been revised based on legislation, availability of the individual ingredients or newly acquired information. The current approved version is available upon request.
