

Superior Solutions

Unlocking penetrating oil with shock effect

- RUST KO is a highly cooling penetrating oil (-43 °C) that greatly shrinks the treated part. Due to this shrinking the connection of the rusted parts rips and detaches.
- RUST KO is also a very strong and fast-acting release agent that expels water, protects and prevents corrosion.
- Contains molybdenum disulfide (MoS_2) for extra lubrication.
- Quickly penetrates rust, corrosion and attached dirt. Loosens rusted or dirty stained nuts and bolts.
- Penetrates quickly and expels moisture on ignition wiring.
- Stops annoying squeak of hinges, wheels, etc.
- Use for light lubrication during assembly and disassembly proceedings.

DIRECTIONS

To loosen parts: spray generously. A light tap accelerates the action. Let it penetrate before loosening. Remove rust and dirt as much as possible with a steel brush.

For expelling moisture, apply the product generously. For example, spray directly on the cabling under the timing to start a wet motor.

APPLICATIONS

RUST KO can be used for all rusted or seized nuts, bolts, screws, etc., seized and corroded assemblies of threaded and cylindrical parts across all industries including cars, trucks, agricultural and construction machinery, general industry.

SPECIFICATIONS

Colour: black

Form: Aerosol

Can Size: \pm 600 ml

Propellant: Propane and butane

Flammable product

All information in this document is based on our practical experience and/or laboratory tests. Due to the large spectrum of circumstances for usage and unpredictable human factors, we recommend that you always test our products before final usage. This technical data sheet has perhaps already been revised based on legislation, availability of the individual ingredients or newly acquired information. We can send you upon request the latest valid version, which is at the same time the sole valid version.
